

FABRIC PERGOLA V.2

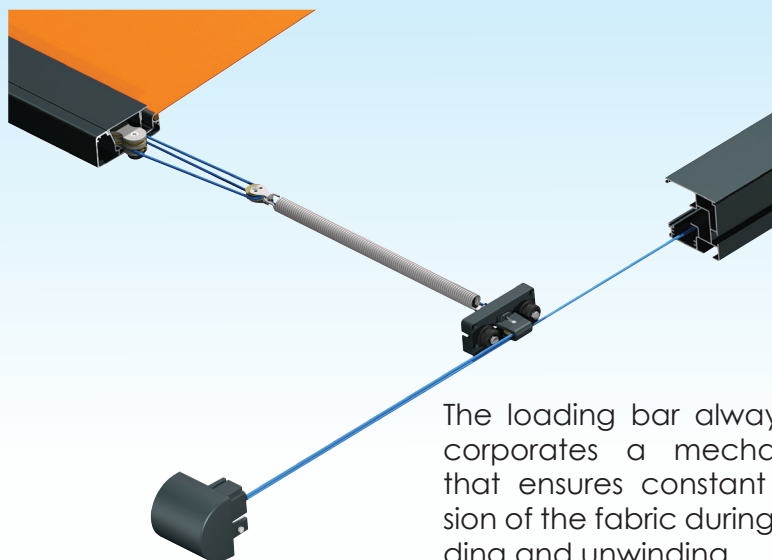

New fabric pergola, the structure and profiles have been redesigned.

ADVANTAGES :

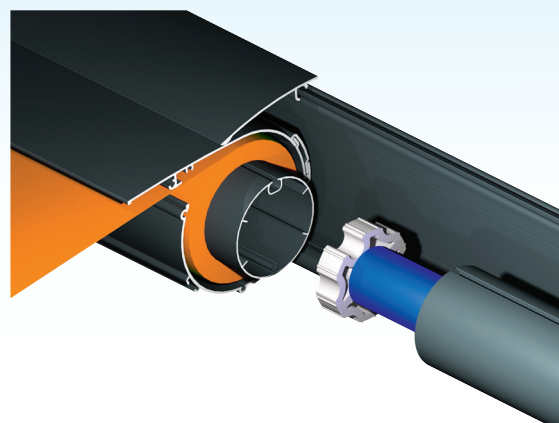

- Modified structure, more robust.
- New design.
- Cassette to protect the fabric.
- Tension system that ensures the tension of the fabric.
- Motorized operation.

FABRIC PERGOLA V2 TECHNICAL INFORMATION

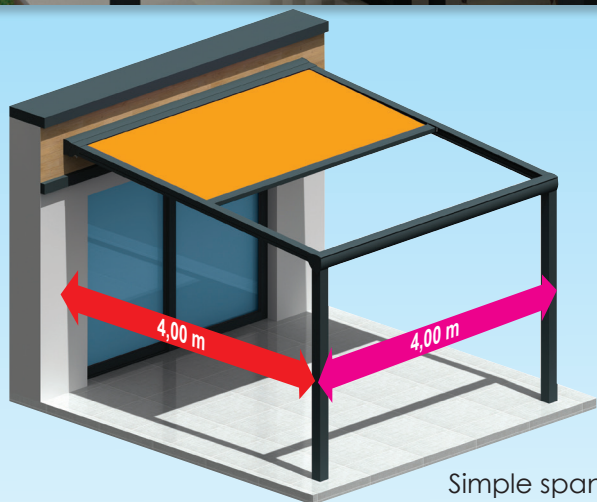

The loading bar always incorporates a mechanism that ensures constant tension of the fabric during winding and unwinding.

Roll up the fabric thanks to the tube and the wired motor (option of remote control and / or LED lighting)
